COVID-19
coronavirus outbreak

2020

COVID-19 UPDATE
23rd April - 29th April 2020

OVERVIEW

The Ministry of Health had at the start of the month, predicted a possible rise of COVID-19 positive cases in the Country to 10,000. However, at the time of writing this report, the number stands at 384 against 129 recoveries and 15 fatalities. The Government continues to set directives to help curb the spread of coronavirus in the Country with the latest action been the extension period of the containment and curfew order for an additional 21 days.

Other than the above, it is notable that a majority of Countries across Africa seem to be suppressing the infection curve, but further guidelines and directives towards individuals' health and safety will be key, amidst this pandemic. COVID-19 has and will continue to affect our way of life and various industry sectors, prompting the need to adjust now, post the pandemic era, and should there be an instance of re-infection.

COVID-19 Statistics in Kenya

384 CASES

18597 TESTS

15 FATALITIES

129 RECOVERIES

BM SECURITY

SECURITY THREATS

There was an overall rise of security-related incidents recorded in the Country towards the end of April 2020 as compared to a similar period last year. Offenders continue to take advantage of the loopholes arising from the COVID-19 situation in the Country to carry out their heinous acts.

CRIME
There have been reports of re-emergence of "boda-boda" thieves in Nairobi County and its environs targeting unsuspecting pedestrians. In this week under reference, three cases were reported in Parklands, Grevillea Grove and Kyuna Estate.
Other than Nairobi, other Counties have also witnessed increase cases of various crimes during the curfew hours. For instance, there has been a spate of killings targeting women and children in Nyandarua and Laikipia Counties.

CIVIL UNREST
The extension of the containment and curfew order for an additional 21 days may lead to possible unrest among some members of the public. It is so since a given number of individuals will not be able to fend for themselves and their families under the given directives.
